Education

Caldwell University

May 2026

Bachelor of Computer Science; Business Analytics Minor; 3.85 GPA; Honors

Caldwell, NJ

Relevant Coursework: Computer Programming, DSA, Full-Stack Development, Operating Systems, Artificial Intelligence, Computational Models & Simulations, DBMS, Data Analytics, Probability & Statistics, Discrete Mathematics, Physics

Awards & Involvement: Recognition Award, Dean's List (8x), Co-founder & Secretary of CS Club, Magna Cum Laude

Work Experience

New York Jets | Caldwell University

Jan 2026 – May 2026

Data Analyst – Consulting Project

Florham Park, NJ

- Surveyed and analyzed up to 2,100 football fans' survey data to uncover behavioral insights.
- Led a team of 5 peers while collaborating with marketing and social media teams to discuss data insights.
- Translated findings into 3 data-driven strategies: fan engagement app, college activation events, and MetLife engagement; presented recommendations to NY Jets executives.

Whisk It All

May 2025 – Aug 2025

Full-Stack Software Engineer – Extern

Glen Ridge, NJ

- Designed and prototyped a hi-fi mock-up in Figma, improving business branding, stakeholder satisfaction, and alignment with business requirements.
- Built and deployed a production-grade website with optimized SEO, CDN delivery, GitHub-connected publishing workflows, and a lightweight CMS for maintainability.
- Optimized customer-facing flows, increasing visitor engagement and retention by converting approximately 30% of online visitors.

Caldwell University

Jan 2023 – Jan 2025

Systems Assistant & Student Tutor

Caldwell, NJ

- Tutored Data Structures, Algorithms, and Full-Stack Development courses impacting up to 1,500 students.
- Supervised software, hardware, and network systems through end-to-end debugging, improving reliability and supporting up to 4 campus events per week.
- Coordinated with the Media Department Head to produce engaging and informative digital content for students.

Projects

NILINK: NIL Marketplace Platform | Next.js, TypeScript, Supabase, Tailwind, Framer Motion, Vercel

2026

- Built a NIL marketplace connecting student-athletes with local and mid-sized businesses to conduct NIL deals seamlessly, across 5 core workflows: campaign discovery, applications, offers, contracts, and deal execution.
- Engineered secure 3-role access with Supabase RLS, protected Next.js APIs, SSR/SWR data fetching, and real-time chat/activity updates.
- Deployed a polished web app with intuitive UI/UX for discovery, applications, offers, contracts, and deals flow.

Lucid Tone: Real-Time AI Music & Ambience Platform | Python, WASM, FastAPI, React, Redis

2026

- Architected a 4-mode focus platform with music customization, ambience setup, focus timer, and distraction shield.
- Built real-time WebSocket streaming for audio playback, dynamic controls with adequate buffering maintaining minimum egress using Opus.
- Developed a stateless Markov Chain music engine generating music roughly 100x faster than real time.

Private Law RAG Agent | Python, Streamlit, ChromaDB, LLaMA, Docker

2025

- Collaborated with a team of 3 to build a privacy-focused RAG system for semantic legal document retrieval and grounded AI responses.
- Implemented a 4-stage AI pipeline for ingestion, embeddings, vector retrieval, and LLaMA-based generation and used Git-based collaborative workflows, code reviews, and debugging for faster development; containerized deployment with Docker.

Home Doc: AI Health Insight App | React, Node.js, Express, Grok, Ollama

2024

- Developed a full-stack AI health platform with 3 core flows: symptom input, AI-generated insights, and personalized recommendations.

RoomMates: Household Management App | Node.js, Vanilla JavaScript, Express, NoSQL (NeDB)

2023

- Built a household management app with chore tracking, REST APIs, CRUD operations, JWT authentication, and protected sessions.
- Implemented the frontend in vanilla JavaScript and built the backend from scratch with Express, reinforcing all the core fundamentals in DOM manipulation, REST API design, routing, authentication, and client-server state management.

Skills

Frontend: TypeScript, React, Next.js, JavaScript, Framer Motion, GSAP, UI/UX, Figma

Backend: Node.js, Express.js, FastAPI, NoSQL, SQL, Python

CI/CD & More: Docker, Git, System Design, DSA
